

„ I Wonder „

Music by : Raimond Valgre / Lyrics by : Harold Payne

I'm sitting here and looking out the window
Remembering the time that you were here
Holding on to all those precious memories
tell me, Has it really been a year?

I wonder if you ever think about me
I've dreamed about you more than you could know
I've tried to let it go
But you're in my soul
I'm caught up in your spell
I might as well admit it

Oh I still have your picture always with me
And not a day goes by without you there
I know that we're apart
and it hurts my heart
But love will find a way
to Bring us together

The stars don't always align
Right at just the perfect time
But that doesn't mean they never will
Return to shine again I'll be waiting here til then

Oh Distance couldn't make my heart grow fonder
But holding you would lift me to the sky
The only thing I need
Is you and me
Walking hand and hand across forever

Instrumental

Stars don't always align
Right at just the perfect time
But that doesn't mean they never will
Return to shine again I'll be waiting here til then

I wonder what you doing at this moment
I try to close my eyes & see you there
I can picture your smile across the miles
And can you picture me right now ?
I wonder.
